Editorial

The Journals aims to flourish and to maintain the standards in research and practice, provide platform and opportunity to present evidence based medicine and analytical assessment of research and probably it is much in deed for students, teachers and health care professionals to enhance the patient care, Researchers, PhD Scholars to explore their scientific research and advanced technology.

Types of Research Work

Research, original articles, review articles, short review, case reports, case studies, case series, short communications, etc. All published articles of our journal are included in the indexing and abstracting coverage of: Index Copernicus, Google Scholar, China National Knowledge Infrastructure (CNKI), Cosmos IF, Directory of Research Journal Indexing (DRJI), WorldCat, Publons, Geneva Foundation for Medical Education and Research

Journal Scope

Health Systems and Policy Research deals with areas of Healthcare Services, Health care, Health systems financing, Health care Management, Public health policy, Global Health, Community health, Human health rights, eHealth, Health disparities, Health statistics, Health ethics, Health care system, Health monitoring, Health policy, Health system policy analysis, Health Emergency, Health services research, Health promotion [1,2]. Health emergency is a separate unit that comes into force during significant communicable disease outbreaks, any chemical, biological or radiological incidents, mass casualty incidents such as an earthquake or any emergency where there are a significant number of people needing medical treatment.

Health care

Health care is an important determinant in promoting the general physical and mental health and well-being of people around the world. Health care includes the diagnosis,

Prevention, treatment of disease, illness, injury, and also physical and mental impairments in human beings.

Health systems financing

Health financing deals with how financial resources are generated, allocated in health systems and is concerned with how to move closer to universal issues related to providing sufficient funds for health; overcome financial barriers in regard of health policies; to provide an efficient health services.

Health care Management

Health care Management or Healthcare Administration is the field identifying with authority, administration, and organization of general public health, health awareness systems, clinics, and doctor's facility systems. Journal of Public Health Policy, New solutions : a journal of environmental and occupational health policy : NS., World Medical and Health Policy, Health Policy, Health Policy and Planning, Journal of Mental Health Policy and Economics.

Global Health

Global health concerns with the health of the entire population of the world. It seeks to prevent diseases from becoming pandemic. Few agencies that work for global health are World Health Organization (WHO), UNICEF, and World Bank. Enjoyment of the human right to health is vital to all aspects of a person life and well-being, and is crucial to the realization of many other fundamental human rights and freedoms. Human Rights relating to health are set out in basic human rights treaties.

Health monitoring

Health monitoring is an informal method of surveying your workforce for symptoms of ill health. This type of occupational health management system can enable you to be aware of

health problems and intervene to prevent problems being caused by work activities.

Health policy

Health policy includes any decisions or plan of actions that are implemented in order to achieve specific health care goals within a society. Health policy can achieve several things and vision for the future and it builds consensus and informs people.

Health system policy analysis

Health policy analysis is a multi-disciplinary approach to public policy that aims to explain the interaction between institutions, interests and ideas in the policy process. It is useful both retrospectively and prospectively, to understand past policy failures and successes and to plan for future policy implementation.

Highlights of 2019

Using Mobile network to contact, advertised call for papers for the experts in the particular field around the world. Approaching and formation of editorial board and reviewer board from particular sphere for peer review process and to maintain frequency of articles.

During the calendar year 2019, IPHSPR received a total around 23 articles were subjected for publication after they are accepted in the peer review process. In the 4 issues of Volume 6 published during the year 2019. Average publication lag time of an article was further reduced to 2-3 weeks.
